

IGI Waxes for Container Candles- Performance Blends

IGI offers its EZ-Pour[®] line, which includes PARAFFLEX[®] and ASTORLITE[®] products for the manufacture of high-quality container candles. Benefits from this product line include:

- Optimized for particular types of jar candles
- Designed to be used without additives (w/ exception of UV inhibitors)
- High quality and consistency offered in three categories: Value, Performance, and Premium Performance

Performance Blends

- Uses more elaborate combinations of additives and base materials compared to Value blends.
- Generally can accommodate high fragrance loads (in non-mottling blends) with improved scent throw properties
- Mottling and Palm grades tested to ensure correct surface appearance
- Excellent burn properties when used with proper wick system
